SG1A

On 7 June 1984, Source 02 reported the following information SG1A concerning the event which occurred on 09 [REDACTED] April 1984 (GMT),

[REDACTED]

Source 02 reported an "awesome" explosion (see drawings 1, 2, and 3) which produced a brilliant white flash containing colors and rainbows (not further identified). This explosion produced tremendous quantities of heat. Its size was "very big, measured in miles." This explosion was an "energetic, electrostatic event producing static, humming, popping, and roaring sounds" (NFI). There were "electric, ozone smells" associated with this event. SG1A

This explosion produced a "column rising up" (NFI, see drawing 2 and 3) and "dirty, layered clouds" (NFI, see drawing 1). There were feelings of "thrusting outwards, shock waves, upheaval, and earth tremors" associated with this explosion (NFI, see drawing 3).

Connected with this explosion were "structures (NFI) buildings (NFI, see drawings 4, 5, 6, and 7) domes (NFI, see drawings 6 and 7), and magnifications" (NFI).

Source was unable to provide any further information concerning date and location of interest.

Attached hereto as EXHIBIT I are drawings 1 thru 7 provided by Source.
